## LIST OF CHAPTERS

Preliminaries		
Outline		
Preface		
	Page	
Chapter 1: Introduction	6	
Part A. Neutron Sources and Neutron Flux		
Chapter 2: The Neutron Probe	10	
Chapter 3: Neutron Sources	12	
Chapter 4: Cold Neutron Moderators	26	
Chapter 5: Neutron Flux on Sample	30	
Part B. Neutron Scattering		
Chapter 6: Introduction to Neutron Scattering	40	
Chapter 7: Neutron Scattering Theory	45	
Chapter 8: Elastic and Quasielastic/Inelastic Neutron Scattering	56	
Chapter 9: Coherent and Incoherent Neutron Scattering	63	
Part C. SANS Technique and Instrumentation		
Chapter 10: The SANS Technique	87	
Chapter 11: The SANS Instrument	95	
Chapter 12: Velocity Selectors and Time-of-Flight Measurements	108	
Chapter 13: Neutron Area Detectors	125	
Chapter 14: Sample Environments	139	
Part D. SANS Resolution and Smearing		
Chapter 15: The SANS Instrumental Resolution	150	
Chapter 16: Neutron Focusing Lenses	168	
Chapter 17: Gravity Correcting Prisms	181	
Chapter 18: Neutron Beam Current	190	
Chapter 19: The Smearing Effect	194	
Part E. SANS Data Corrections and Data Reduction		
Chapter 20: SANS Data Corrections	207	
Chapter 21: SANS Data Reduction	215	
Part F. Simple SANS Data Interpretation		
Chapter 22: Standard Plots	223	
Chapter 23: Empirical Models	240	
Chapter 24: Representative SANS Data	252	
Chapter 25: SANS Data from Oriented Samples	259	
Part G: SANS Data Modeling		
Chapter 26: Radius of Gyration Calculations	268	

Chapter 27: Single-Particle Form Factors	289
Chapter 28: Form Factors for Polymer Systems	294
Chapter 29: Effect of Polydispersity	307
Chapter 30: Scattering from Dilute Polydisperse Systems	314
Chapter 31: Structure Factors for Polymer Systems	319
Chapter 32: Structure Factors for Particulate Systems	333
Chapter 33: Scattering from Fractal Systems	344
Chapter 34: The Multicomponent Random Phase Approximation	352
Chapter	
<b>Part H. SANS from Polymers</b>	
Chapter 35: Introduction to Polymers	367
Chapter 36: Polymer Contrast Factors	371
Chapter 37: SANS from Polymer Solutions	377
Chapter 38: SANS from Polymer Blends	387
Chapter 39: SANS from Block Copolymers	397
Chapter 40: SANS from Ternary Polymer Blends	406
Chapter 41: SANS from Polymers Literature Review	414
<b>Part I. SANS from Complex Fluids</b>	
Chapter 42: Phase Diagrams for Micellar Systems	432
Chapter 43: SANS from Crystalline Lamellae	448
Chapter 44: SANS from a Pluronic	466
Chapter 45: SANS from Ionic Micelles	481
Chapter 46: SANS from Complex Fluids Literature Review	490
<b>Part J. SANS in Biology</b>	
Chapter 47: Elements of Biology	504
Chapter 48: SANS from Phospholipid Bilayers Under Pressure	525
Chapter 49: SANS from DNA	530
Chapter 50: SANS from a Protein Complex	544
Chapter 51: SANS in Biology Literature Review	557
<b>Part K. Other SANS Topics</b>	
Chapter 52: SANS from Polymer Blends Under Pressure	568
Chapter 53: SANS Under Shear	584
Chapter 54: Solvation in Mixed Solvents	597
Chapter 55: Clustering in Macromolecular media	605
Chapter 56: SANS from Polymeric Materials	616
Chapter 57: Neutron Scattering with Spin Polarization	627
Chapter 58: Other SANS Topics Literature Review	634
<b>Part L. Even Lower SANS Scales</b>	
Chapter 59: SANS Resolution with Slit Geometry	648
Chapter 60: The VSANS Technique	655
Chapter 61: The USANS Instrument	673

**Part M. Final Issues**

Chapter 62: Gallery of SANS Data Images	683
Chapter 63: Brief History and Future Prospect	693

**Part N. Appendices**

Appendix 1: Useful Mathematical Expressions	701
Appendix 2: Elements of Quantum Mechanics	712

**Part O. Indexes**

List of Symbols and Notation	717
------------------------------	-----
